Britannica - In this paper, a
reliable method for detecting
human faces in color images is
proposed. This system firstly
detects skin color in YCgCr and
YIQ color space, then filters
binary texture and the result is
morphological processed, finally
converts skin tone to the preferred
skin color configured by users in
YIQ color space. The real-time

produced by a bricklayer, using
bricks and mortar. Typically, rows
of bricks called courses are laid
on top of one another to build up
a structure such as a brick wall..
Bricks may be differentiated from
blocks by size. For example, in
the UK a brick is defined as a unit
having dimensions less than
