nim apos pdf - For Cisco
Asynchronous Serial NIM - 16/24
Port, new Cable CAB-ASYNC-8
is introduced. 16-port NIM has
are 2 sockets. Both the new and
old cables can be plugged-in into
both the sockets. 24-port NIM has
three sockets. You can use only
the top socket for the old cable.
The following table lists the cable

Technologies - Strings in Nim are
both zero-terminated and have a
length field. A string's length can
be retrieved with the builtin len
procedure; the length never
counts the terminating zero.
Accessing the terminating zero is
an error, it only exists so that a
Nim string can be converted to a
cstring without doing a copy.
